

PB 5630

Nice flex hybrid with a girthy ear and good dry down. Good roots and late season health.

Very good early vigor.

Good intactness.

Excellent stalks.

Glyphosate tolerant.

Plant medium to high populations on any ground for best results.

PB 5630

86 Day Maturity

- Top end yield potential
- Great late season intactness
- Good looking plant type

AVAILABLE TECHNOLOGIES

Conventional

GT

PLACEMENT

Maturity Zones	1,2
Best Soil Type	Any
Population Range	28-34
Corn On Corn	Excellent
No Till Usage	Very Good
Irrigation Rating	Very Good
Sand Rating	Very Good
Clay Rating	Very Good
Loam Rating	Very Good
Peat Rating	Very Good

AGRONOMICS

Seeding Vigor	Very Good
Stalk Rating	Very Good
Root Rating	Very Good
Plant Height	Medium-Tall
Stay Green	Very Good
Heat Tolerance	Very Good
Drought Tolerance	Very Good
Disease Rating	Very Good

EAR & GRAIN

Ear Flex	Semi-Flex
Kernel Row Range	14-16
50% Silking	1200
Black Layer	2100
Ear Height	Medium
Yield	Excellent
Test Weight	Very Good
Dry Down	Fast

Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the technology agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements.

Monsanto Company is a member of Excellence Through Stewardship® (ETS). Monsanto products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Monsanto's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Biotechnology Industry Organization.

B.t. products may not yet be registered in all states. Check with your Monsanto representative for the registration status in your state.

IMPORTANT IRM INFORMATION: Genuity® RIB Complete® corn blend products do not require the planting of a structured refuge **except** in the Cotton-Growing Area where corn earworm is a significant pest. See the IRM/Grower Guide for additional information. Always read and follow IRM requirements.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® crops contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® brand agricultural herbicides. Roundup® brand agricultural herbicides will kill crops that are not tolerant to glyphosate. Genuity Design®, Genuity Icons, Genuity®, RIB Complete and Design®, RIB Complete®, Roundup Ready 2 Technology and Design®, Roundup Ready 2 Yield®, Roundup Ready®, Roundup®, SmartStax and Design®, SmartStax®, VT Double PRO® and VT Triple PRO® are trademarks of Monsanto Technology LLC. LibertyLink and the Water Droplet Design® is a registered trademark of Bayer. Herculex® is a registered trademark of Dow AgroSciences LLC. Respect the Refuge and Corn Design® and Respect the Refuge® are registered trademarks of National Corn Growers Association. All other trademarks are the property of their respective owners.

Herculex® Insect Protection technology by Dow AgroSciences and Pioneer Hi-Bred, Herculex®, the Herculex Shield Logo and Quad-Stack™ are trademarks of Dow AgroSciences LLC. Crops and other material produced from Bt seed can only be exported to, used, processed and/or sold in countries where necessary regulatory approvals are in place for the biotech traits contained in this seed. Talk to your grain handler or other purchaser in advance to facilitate appropriate crop handling and marketing. For further information about your crop marketing options, contact Dow AgroSciences at 877-4-TRAITS (877-487-2487).

Bayer CropScience LP, 2 T.W. Alexander Drive, Research Triangle Park, NC 27709. Always read and follow label instructions. Bayer, the Bayer Cross, Liberty, LibertyLink and the Water Droplet Design are registered trademarks of Bayer. Liberty is not registered in all states. For additional product information call tollfree 1-866-99-BAYER (1-866-992-2937) or visit our website at www.BayerCropScience.us

Agrisure®, Agrisure Artesian®, Agrisure Duracade™, Agrisure Viptera®, E-Z Refuge®, ApronMaxx®, Apron XL®, Avicta®, Cruiser®, CruiserMaxx®, Dynasty®, Maxim® and Vibrate® are trademarks of a Syngenta Group Company. Important: Always read and follow label instructions. Some crop protection products may not be registered for sale or use in all states or counties. Please check with your local extension service to ensure registration status. Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control. **Caution: Do not spray E-Z Refuge® products with Liberty® or Ignite® Brand Herbicides.** Agrisure® Technology incorporated into these seeds is commercialized under license from Syngenta Seeds, Inc. Herculex® Technology incorporated into these seeds is commercialized under license from Dow AgroSciences LLC.

Respect the Rotation™ is an initiative to elevate the importance and grower adoption of herbicide diversity to prevent or manage weed resistance. Glyphosate weed resistance is a dominating threat throughout the United States that affects land values, rental agreements, conservation tillage and can greatly reduce yields. The use of Integrated Weed Management practices, such as use of residuals, pre-emergence herbicides and rotation of crops, traits and herbicides, is critical as no one method is likely to be completely successful.

STS™ logo is a registered trademark of E.I. du Pont de Nemours and Company. DuPont™ and STS™ are trademarks of DuPont or its affiliates. STS™ is a tolerance gene that allows aggressive rates of either Synchrony® XP herbicide or Harmony® SG herbicide tank mixed with glyphosate in post, in-crop applications. This provides a simple, cost-effective weed control option for tough weeds such as lambsquarters, marehail, morning glory, ragweeds, yellow nutsedge, and many other broadleaf or sedge weeds in soybeans. Contact your local DuPont™ agriculture retailer or local sales representative for details. Always read and follow all label directions and precautions for use.

AGRISURE TRAITS

Agrisure®GT

Hybrids with the Agrisure® GT trait provide excellent tolerance to in-crop applications of glyphosate-based herbicides.

Agrisure Artesian®GTA

Agrisure Artesian® GTA technology combines Agrisure Artesian water optimization technology with Agrisure® GT for tolerance to in-crop applications of glyphosate-based herbicides.

Agrisure® LIBERTY CB/LL LINK

Agrisure® CB/LL trait provides protection against European corn borer and glufosinate tolerance.

Agrisure® LIBERTY GT/CB/LL LINK

The Agrisure® GT/CB/LL trait stack provides season-long control or suppression of insects as well as herbicide flexibility with both glyphosate and glufosinate tolerance.

Agrisure Viptera® 3220 E-Z Refuge

The Agrisure Viptera® 3220 E-Z Refuge® trait stack offers corn growers multiple modes of action against broad lepidopteran pests and European corn borer with a 5% integrated, single bag refuge.

Agrisure® LIBERTY 3000GT LINK

Agrisure® 3000GT is the only triple stack with no history of yield drag. Agrisure 3000GT hybrids offer herbicide flexibility—with both glyphosate and glufosinate tolerance—as well as control or suppression of insects.

Agrisure Viptera® 3111 LIBERTY LINK

The Agrisure Viptera® 3111 trait stack provides growers with unsurpassed multiple-pest control of 16 above-and below-ground pests.

Agrisure® 3122 E-Z Refuge

Hybrids containing the Agrisure® 3122 E-Z Refuge® trait stack offer growers the benefits of a structured reduced refuge trait stack featuring two modes of action against corn borer and corn rootworm.

Agrisure Duracade® 5122 E-Z Refuge

The Agrisure Duracade™ 5122 E-Z Refuge® trait stack combines the Agrisure Duracade™ trait with the trusted Agrisure® RW trait for dual modes of action against corn rootworm, the Agrisure® CB/LL trait for control of corn borer, the Herculex® 1 trait for an additional mode of action against corn borer and broad lepidopteran control and the Agrisure® GT trait for glyphosate tolerance.

Agrisure Duracade® 5222 E-Z Refuge

The Agrisure Duracade™ 5222 E-Z Refuge® trait stack includes the same traits as the Agrisure Duracade™ 5122 trait stack with the addition of the Agrisure Viptera® trait for breakthrough control of the multi-pest complex, a collection of the most destructive lepidopteran corn pests.

All Partners Brand Seed is treated with one of the following:

CruiserExtreme® 250

A seed company-applied promotional combination of four active ingredients that deliver .25 mg ai/seed of Cruiser® (thiamethoxam) plus three fungicides: Maxim® XL, Apron® XL and Dynasty®. Cruiser Extreme 250 for corn offers superior protection against a broad spectrum of early-season insect pests, as well as enhanced disease protection against all four major fungal groups in corn to help provide outstanding plant stands and vigor, and protect yield potential.

Cruiser Extreme 250 is an on-seed application of Cruiser 5FS insecticide at a rate of 0.25 mg ai/seed plus three fungicides: Apron XL, Maxim XL and Dynasty fungicide.

CruiserMaxx® Corn 250

CruiserMaxx® Corn 250 insecticide/fungicide seed treatment, a combination of separately registered products, offers broad-spectrum protection against early season insects, and seedborne and soilborne diseases.

CruiserMaxx Corn 250 is an application of Cruiser 5FS insecticide delivered at the 0.25 mg ai./seed rate and Maxim Quattro fungicide.

CruiserMaxx® Beans

CruiserMaxx® Beans protects against a wide spectrum of early-season insects and diseases. CruiserMaxx Beans provides protection the moment the seed is planted increasing plant stand, vigor and health for improved yield potential.

CruiserMaxx Beans is an on-seed application of one of the following: CruiserMaxx or CruiserMaxx Advanced alone or with Apron XL; Cruiser 5FS, Maxim 4FS and Apron XL; or Cruiser 5FS and an ApronMaxx brand fungicide.

BENEFITS OF NEW SEED

- Convenience**
- High quality and high yield potential product vs. bin-run
 - Reliable seed supply in many maturities
- Economics of New Seed vs. Bin-Run**
- Average loss of ~10–15% cleantout at harvest for bin-run seed
 - Bin-run planting rates are generally 15% higher than new certified seed
- Limited Warranty Benefits**
- Dealer agronomic support before and after the sale
 - Risk management benefits of Roundup Rewards® (over \$600 million in benefits paid)
- New Innovations**
- Monsanto's 100% commitment to agriculture
 - Our very preliminary estimate is that farmers get a \$6 benefit for each \$1 spent on private sector research.

SOYBEAN PIRACY STATEMENT

Seeds containing the Roundup Ready® trait and the Genuity® Roundup Ready 2 Yield® trait are protected under numerous U.S. patents. Seed containing patented traits, such as seed containing the Roundup Ready® and Roundup Ready 2 Yield® traits, can only be used to plant a single commercial crop. It is unlawful to save and replant Roundup Ready® soybeans and Genuity® Roundup Ready 2 Yield® soybeans. Additional information and limitations on these products are provided in the Monsanto Technology Stewardship Agreement and the Monsanto Technology Use Guide. The licensed U.S. patents for Monsanto technologies can be found at the following webpage: <http://www.monsanto.com/productpatents>.

LIBERTYLINK® PATENT STATEMENT

LibertyLink® Soybean seeds containing LibertyLink® are protected under multiple U.S. patents and may be planted only to produce one (1) commercial crop, and only after signing a Bayer Grower Technology Agreement. It is illegal to save or catch soybean seeds containing the LibertyLink trait for use as planting seed or for transfer to others for use as planting seed.

STS® is a tolerance gene that allows aggressive rates of either Synchrony® XP herbicide or Harmony® SG herbicide tank mixed with glyphosate in post, in-crop applications. This provides a simple, cost-effective weed control option for tough weeds such as lambsquarters, marehail, morning glory, ragweeds, yellow nutsedge, and many other broadleaf or sedge weeds in soybeans. Contact your local DuPont™ agriculture retailer or local sales representative for details. Always read and follow all label directions and precautions for use.
