

**Partners Brand**

**1416 LL**

**1.4 RM**

- New high yield genetics
- Outstanding health
- Bushy, good looking plant
- Even better on better soils

## Agronomics

Plant Type	Bushy
Plant Height	37
Emergence	1.0
Lodging Score	2.2
Shattering Score	1.0
Flower Color	Purple
Pubescence Color	Lt Tawny
Pod Wall Color	Tan

**LibertyLink® Patent Statement**

Seeds containing the LibertyLink® trait are protected under multiple U.S. patents and may be planted only to produce one (1) commercial crop, and only after signing a Bayer Grower Technology Agreement. It is illegal to save or catch seeds containing the LibertyLink trait for use as planting seed or for transfer to others for use as planting seed.

The LibertyLink® system is a simply better solution combining high-performing genetics with excellent weed control on tough-to-control and resistant weeds for high yields that deliver. With more than 60 million acres of soybeans, corn, cotton and canola now having the LibertyLink trait, growers can spray powerful Liberty®, the only working nonselective herbicide to handle tough-to-control weeds including Palmer amaranth, giant ragweed, kochia, waterhemp and marestail.
