

CORN & SOYBEAN

SEED GUIDE

Fall 2025 ~ Spring 2026

📍 4610 East State Road 120
Howe, Indiana 46746

📞 (877) 790-0016

✉ info@partnersbrandseed.com

Our seed corn is produced under irrigation in Howe, Indiana by Lord's Seed — one of the most respected wholesale seed producers in the world.

As an independent seed company, Partners Brand offers you choices. We have licenses from many different genetic suppliers, including all of the major suppliers. We can pick and choose the best from each program to offer you cutting-edge genetics and traits, as well as a number of cross source hybrids with parents from two different breeding programs. This genetic diversity keeps our customers from planting a dangerously narrow band of genetic material.

OUR MISSION

To help our customers by supplying the appropriate products at a fair price. To do business in a Christian like manner with quality, simplicity, integrity, and honesty in everything that we do.

We offer traits, but don't push them where they don't make economic sense for the customer — as witnessed all too often with other companies.

Our core values of integrity and honesty prevent us from promoting products that harm our customers to enhance our bottom line. We want to help you add to your bottom line!

Believing in fair pricing, we don't have to impress Wall Street; we only need to impress our customers. We keep it simple by offering great seed products and not playing complicated marketing games.

IF YOU ARE LOOKING FOR DIVERSE CHOICES, WE OFFER:

- » Large selection of **CONVENTIONAL CORN HYBRIDS**
- » Wide variety of **TRAITED CORN HYBRIDS**
- » Several **WAXY HYBRIDS**
- » Various **HIGH OIL HYBRIDS**
- » Selection of **E+ HIGH ENERGY HYBRIDS**
- » Unique **HIGH ROW COUNT HYBRIDS (HRC)**

Visit **PartnersBrandSeed.com** to find a distributor near you!

HYBRIDS THAT DELIVER FOR SILAGE

When it comes to silage, not all corn is created equal. Our select hybrids are bred and tested to deliver high-energy, high-nutrition feed that performs in the bunk and in the barn.

These hybrids offer:

- **Double the energy** with our E+ program for enhanced animal performance
- **Improved protein content** for balanced rations
- **Higher NDFD 30 scores** for better fiber digestibility
- **More milk or meat per ton** — better returns from every acre

Whether you're feeding a dairy herd or growing for beef, our silage-ready hybrids help you get the most from your silage ground. We're committed to growing the best seed, delivering it to your farm at a fair price, and backing it with exceptional service every step of the way.

Now in its second year, our Proven Non-GMO Program continues to set the standard for quality in Non-GMO seed production. Personally overseen by company owner John Larimer, each placement is carefully approved and monitored from start to finish.

To maintain the highest purity standards, production takes place within a dedicated Non-GMO block using Ultra-Pure Seedstocks whenever available.

We implement rigorous isolation practices, including increased distance, strategic planting of male buffer rows, and timing isolations when feasible.

Every Proven Non-GMO lot is PCR or similar tested and available exclusively to our Partners Brand Distributors. With these strict protocols in place, we proudly offer a **99.6% GMO-free guarantee** on your Proven Non-GMO seed order.

Choose **CONFIDENCE**.
Choose **PURITY**.
Choose **PROVEN NON-GMO**.

“The group at Partners Brand Seed has always been great to work with. We have been a distributor for years and really like the simplicity of having a full lineup of both conventional and traited corn options all from one company. Having consistent hybrids at a fair price allows us to grow our business and as the ag landscape continues to evolve we know Partners Brand will be there every step of the way.”

We are proud to offer Certified Organic seed corn for growers committed to organic production acres. Our organic seed is produced in partnership with a company that specializes exclusively in organic seed corn, ensuring the highest standards in purity, performance, and compliance.

For the upcoming season, we are offering two organic hybrids:
PB 77C079
PB 83C036

Both are available in limited supply, so early booking is strongly encouraged.

If you're looking for proven performance in an organic package, these hybrids are a great fit for your operation.

“I have had tremendous results with Partners Brand Seed on my growers farms. Specifically, many of the High Row Count (HRC) varieties have proven to perform very consistently year after year out on some of my best growers operations. A great customer and friend of mine, Cameron Dakin, has had success chopping those on his dairy farm for years. We both look forward to working with Partners Brand for many more seasons to come.”

“Partners Brand Seed adds high-quality, diverse genetics to our farm. Planting from multiple genetic backgrounds allows us versatility no matter what the growing season may bring. In today’s farming, that’s a necessity!”

– Barry and Lee Welty;
Caverndale Farms,
Danville, KY

PARTNERS BRAND SIMPLY GREAT SEED

Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Technology/Stewardship Agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation and agreement to comply with the most recent stewardship requirements.

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all applicable regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS.

B.t. products may not be registered in all states. Check with your seed brand representative for the registration status in your state.

YieldGard VT PRO® is a registered trademark used under license from the Bayer Group. Refuge seed may not always contain the DroughtGard® trait.

IMPORTANT IRM INFORMATION: Certain products are sold as RIB Complete® corn blend products, and do not require the planting of a structured refuge except in the Cotton-Growing Area where corn earworm is a significant pest. Products sold without refuge in the bag (non-RIB Complete) require the planting of a structured refuge. See the IRM/Grower Guide for additional information. Always read and follow IRM requirements.

Roundup Ready® Technology contains genes that confer tolerance to glyphosate. Roundup Ready® 2 Technology contains genes that confer tolerance to glyphosate. Plants that are not tolerant to glyphosate may be damaged or killed if exposed to those herbicides.

Insect control technology provided by Vip3A is utilized under license from Syngenta Crop Protection AG.

Performance may vary from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

Herculex® is a registered trademark of Dow AgroSciences LLC. Agrisure Viptera® is a registered trademark of a Syngenta group company. Respect the Refuge and Corn Design® and Respect the Refuge® are registered trademarks of National Corn Growers Association. Acceleron®, DroughtGard®, RIB Complete®, Roundup Ready 2 Technology and Design®, Roundup Ready®, SmartStax®, Trecepta®, VT Double PRO®, and VT4PRO™ are trademarks of Bayer Group.

Important: Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides. Agrisure®, Agrisure® Above, Agrisure® Total, Agrisure Viptera®, Artesian®, Duracade®, Duracade Viptera®, Duracade Viptera™ Z3, E-Z Refuge®, Viptera®, and Viptera™ Z3 are trademarks of a Syngenta group company.

More information about Duracade® is available at www.biotechstatus.com.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, post-emergent weed control of Liberty® herbicide for optimum yield and excellent weed control. LibertyLink®, Liberty® and the Water Droplet logo are registered trademarks of BASF.

Corn trait technology incorporated into these seeds is commercialized under license from Syngenta Seeds, LLC. Herculex® Technology incorporated into these seeds is commercialized under license from Corteva Agriscience LLC. HERCULEX® and the HERCULEX Shield are trademarks of Corteva Agriscience LLC.

Seeds containing the PowerCore® Enlist®, PowerCore® Enlist® Refuge Advanced®, Enlist® Corn - REFUGE and Enlist E3® traits are protected under one or more U.S. patents which can be found at www.traitstewardship.com. The purchase of this traited seed includes a limited license to produce a single crop in the United States. The use of seed from such a crop and/or the progeny thereof for propagation or seed multiplication or for production or development of a hybrid or different variety of seed is strictly prohibited. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Corteva Agriscience Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements. To plant PowerCore Enlist, PowerCore Enlist Refuge Advanced, Enlist Corn - REFUGE and Enlist E3 seed, you must have a limited license from Corteva Agriscience (or other appropriate affiliates). In consideration of the foregoing, Corteva Agriscience grants to the Grower a limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed.

Enlist E3® soybean seeds containing the Enlist® trait can only be used to plant a single commercial crop. It is unlawful to save and replant Enlist E3 soybeans. Additional information and limitations on the use of these products are provided in the Corteva Agriscience Technology Use Agreement and Enlist® Soybean Product Use Guide. U.S. patents for Corteva Agriscience technologies can be found at www.corteva.us/Resources/traits-stewardship.html.

Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the Corteva Agriscience policies regarding stewardship of those products. In line with these guidelines, our product launch process for responsible launches of new products includes a longstanding process to evaluate export market information, value chain consultations, and regulatory functionality. Growers and end-users must take all steps within their control to follow appropriate stewardship requirements and confirm their buyer's acceptance of the grain or other material being purchased. For more detailed information on the status of a trait or stack, please visit www.biotechstatus.com.

Excellence Through Stewardship® is a registered trademark of Global Stewardship Group.

Properly managing trait technology is key to preserving it as a long term crop protection tool. Growers who fail to comply with IRM requirements risk losing access to this product. To help preserve the effectiveness of B.t. corn technologies, growers planting B.t. corn technologies are required to follow an IRM Plan. Consult the Corn Product Use Guide for appropriate refuge configuration options. Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Technology Use Agreement and Product Use Guide. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements. For complete details on IRM requirements for hybrids with B.t. technology, including refuge examples and important information on the use of insecticides on refuge and B.t. corn acres, please consult appropriate Product Use Guide. Go to www.corteva.us/Resources/traits-stewardship.html to download the latest Corteva Agriscience Corn Product Use Guide.

Following burndown, Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use with Enlist® crops. Consult Enlist® herbicide labels for weed species controlled. Enlist Duo and Enlist One herbicides are not registered for use or sale in all states and counties; are not registered in AK, CA, CT, HI, ID, MA, ME, MT, NH, NV, OR, RI, UT, VT, WA and WY; and have additional subcounty restrictions in AL, GA, TN and TX, while existing county restrictions still remain in FL. All users must check "Bulletins Live! Two" no earlier than six months before using Enlist One or Enlist Duo. To obtain "Bulletins," consult epa.gov/espp/, call 1-844-447-3813, or email ESPP@epa.gov. You must use the "Bulletin" valid for the month and state and county in which Enlist One or Enlist Duo are being applied. Contact your state pesticide regulatory agency if you have questions about the registration status of Enlist® herbicides in your area. ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. IT IS A VIOLATION OF FEDERAL AND STATE LAW TO USE ANY PESTICIDE PRODUCT OTHER THAN IN ACCORDANCE WITH ITS LABELING. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USE IN THE STATE OF APPLICATION. USE OF PESTICIDE PRODUCTS, INCLUDING, WITHOUT LIMITATION, 2,4-D-CONTAINING PRODUCTS NOT AUTHORIZED FOR USE WITH ENLIST CORN AND SOYBEANS, MAY RESULT IN OFF-TARGET DAMAGE TO SENSITIVE CROPS/AREAS AND/OR SUSCEPTIBLE PLANTS, IN ADDITION TO CIVIL AND/OR CRIMINAL PENALTIES. Additional product-specific stewardship requirements for Enlist crops, including the Enlist Product Use Guide, can be found at www.traitstewardship.com. The transgenic soybean event in Enlist E3® soybeans is jointly developed and owned by Corteva Agriscience and M.S. Technologies, L.L.C.™ Trademarks of Corteva Agriscience and its affiliated companies.

STS®

herbicide tolerant trait

This variety contains a trait providing enhanced tolerance to labeled specific sulfonylurea soybean herbicides. The STS® gene will not safeguard this variety against other herbicide chemistries which are labeled to be used only over-the-top of crops that have a different and specified herbicide resistant gene. Always read and follow herbicide directions prior to use.

Not all herbicides are registered for sale or use in all states or counties in the United States or all provinces in Canada. Contact your local regulatory agency to determine if a product is registered for sale or use in your area. Always read and follow label directions.

ACCIDENTAL APPLICATION OF INCOMPATIBLE HERBICIDES TO THIS VARIETY COULD RESULT IN TOTAL CROP LOSS.

YOU MUST SIGN A TECHNOLOGY USE AGREEMENT AND READ THE PRODUCT USE GUIDE PRIOR TO PLANTING.

The purchase of these seeds includes a limited license to produce a single soybean crop in the United States (or other applicable country). The use of seed from such a crop or the progeny thereof for propagation or seed multiplication or for production or development of a hybrid or different variety of seed is strictly prohibited. Resale or transfer of the seed is strictly prohibited.

THE NEW STANDARD FOR WEED CONTROL & YIELD PERFORMANCE ENLIST® WEED CONTROL SYSTEM

ON-TARGET APPLICATIONS:

90% less drift than traditional 2,4-D | 96% less volatile than 2,4-D ester

Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are labeled for preemergence and postemergence use on Enlist® crops.

SOYBEANS CORN

Glyphosate
Glyphosate

Glufosinate
Glufosinate

FOP Herbicides

- Convenient proprietary blend of 2,4-D choline and glyphosate
- The two modes of action work together to deliver control of yield-robbing weeds and help prevent resistance
- Straight goods 2,4-D choline with additional tank-mix flexibility
- Provides additional tank-mix flexibility with glyphosate, glufosinate and other qualified tank-mix products, allowing for a customized weed control program to fit each farm

PARTNERS BRAND SOYBEAN VARIETIES

PB 2524 E3

2.5 RM

AVAILABLE AS

- Great defensive package with PEKING SCN
- Performs in all yield environments
- Plant that works East, Central, and West
- Moves South and yields with longer season varieties

PLANT TYPE	Medium-Bush
PLANT HEIGHT	Medium-Tall
FLOWER COLOR	Purple
PUBESCENCE COLOR	Light Tawny
POD WALL COLOR	Tan
HILUM COLOR	Black
SCN MARKER	PEKING
SCN RESISTANCE	R3,MR14

SOYBEAN TRAITS & TREATMENTS

GLYPHOSATE
TOLERANT

GLYPHOSATE TOLERANT (GT)

If you are looking for a soybean that can give you the best return on investment look no further than Partners Brand GT soybeans. With proven genetics that can handle a wide variety of soil types and stressful environments season after season and yield potential that competes side by side with the newest varieties on the market, Partners Brand GT soybeans can be your answer to being more profitable on every acre.

ENLIST E3® (E3)

Enlist E3® soybeans offer the most advanced trait technology available in soybeans, providing a new standard for weed control and yield performance. With Enlist E3® soybeans, the three herbicide tolerances - 2,4-D choline, glyphosate and glufosinate - combine to deliver a complete system with more weed control options. Using multiple herbicide sites of action in a program approach helps control weeds in the current growing season while limiting the ability for herbicide-resistant weeds to develop. Enlist E3® soybeans give farmers the flexibility to employ multiple herbicide sites of action.

ALERT 3030

- Outperforms other treatments by killing insects, not just repelling
- Thrives in cool wet conditions with long lasting effectiveness for seed and seedlings
- Strong systemic and contact broad spectrum fungicide with a systemic seed sterilant
- Extended 3-4 week disease suppression that just works longer
- Including Headsup® plant protectant that adds the most robust actives against White Mold and solid performance with Sudden Death Syndrome.
- Additional biostimulant activity from Rapidity®ST creates a cellular food source for increased consistency with growth & development.

CONTROL WHAT YOU CAN.

Keep your in-season cash flow strong and improve your yield and bottom-line profit. For your crop input purchases, use the **Multi-Use Account** from John Deere Financial. You can increase your cash flow and lower your cost per acre with our buy now, pay later options and rates as low as 0% that can save you thousands.
